PROGRAMMING PROJECTS

PROJECT 1 – CREATING AN INTERACTIVE APP USING SERVER-SIDE API'S

TECHNOLOGIES USED: BULMA, MOMENT.JS, COCKTAIL DB API, GIPHY API, JQUERY PLUGIN, JAVASCRIPT

Collaborated with colleagues to build and deploy a client-side web app using GitHub Pages, learned agile software development, git branching workflow and the use of server-side API's

BURGER APP – CREATING A FULL STACK APP DEPLOYED TO HEROKU

TECHNOLOGIES USED: MYSQL, EXPRESS, EXPRESS-HANDLEBARS, ORM, NODE.JS, JAVASCRIPT

Following the MVC design pattern, I was able to render dynamic HTML using Handlebars.js template engine, implement MVC modularization in a full-stack web app, utilizing ORM as well as configuring Heroku for deployment using MySQL

EMPLOYEE-TRACKER APP – CREATING A FULL STACK APP DEPLOYED TO HEROKU

TECHNOLOGIES USED: NODE.JS, INQUIRER, MYSQL, CLI, ASYNCHRONOUS JAVASCRIPT, ES6

I built an interactive command-line app that processes user input, modularization and initialized new Node.js projects with npm, install and imported dependencies, as well as utilizing ES6 and arrow function, and made server-side API calls with Axios.
